Gear Storage solution

SUV HATCH DIVISION

REAR HATCH RESTRAINT SYSTEM

Designed For Fleet Safety

Safely Secure Your Gear

Keep everything tightly locked in place and prevent your equipment from shifting or becoming dangerous projectiles during sudden stops or crashes.

The Quarantine SUV Interior Restraint System was specifically designed with Transport Canada & is Currently used by many of their divisions throughout CANADA. And now being adopted by many Fire & EMS Organizations.

Eliminate Dangers

"When considering unsecured gear can potentially become 20 X its own weight in sudden stop or crash
Our team needed to find a solution."
